## #40 THYDRACUT

Doctor's Choice Thyroxycut is a unique weight loss formula designed to increase metabolism by stimulating the production of thyroxin, a key thyroid hormone. Raising the Basal Metabolic Rate (BMR) is the key to the fat-burning process, which of course leads to loss of excess weight. As always, Doctor's Choice ensures that the highest-quality ingredients are used, in a combination meant to enhance the health of the thyroid gland, which regulates the metabolism and calcium balance.

Organic raw thyroid and raw adrenal tissue concentrates in homeopathic form help both thyroid and adrenal function, but it is the addition of the amino acid L-Tyrosine, bladderwrack derived from kelp, and selected trace minerals, acting in synergy, that makes this formula special, as it supports different aspects of the complex metabolic system.

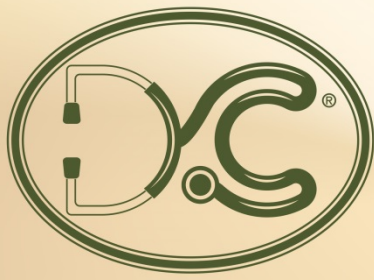

### **Thyroidinum (Homeopathic Raw Thyroid Gland):**

Thyroidinum, the homeopathic form of raw thyroid gland, stimulates the secretion of T3 and T4 hormones by the thyroid. Over a long period of time, even a small decline in the output of these hormones can have profound consequences for health and well-being.

### **Adrenalinum (Homeopathic Raw Adrenal Gland):**

The adrenal glands are responsible for the production of cortisone, as well as the secretion of adrenaline. The adrenal cortex, the outer section of the adrenal glands, not only maintain the salt and water balance in the body, but also play a role in the metabolism of carbohydrates and the regulation of sugar levels, as well as having some influence over the sex hormones. In addition, the cortex affects carbohydrate metabolism, and influences the metabolism of both protein and fat.

The medulla, or inner core of the adrenal glands, produces the hormone epinephrine, which is also called adrenaline. Stores of adrenaline are called upon when the body is under stress. The hormone speeds up the rate of metabolism and produces other physiological changes designed to help the body cope with danger. Adrenalinum stimulates the adrenal glands in all their functions.

Note: The homeopathic form of both Thyroidinum and Adrenalinum provides stimulation for the thyroid and adrenal glands at a sub-molecular level. Homeopathic remedies are generally accepted as safe by

health authorities due to their extreme dilution, yet are so effective that even Her Majesty Queen Elizabeth has a Royal Homeopath and is known for giving remedies to her personal staff.

**Fucus esiculous (Bladderwack):** For centuries, this form of kelp seaweed has been used medicinally to stimulate the thyroid gland as a treatment for obesity and cellulite accumulation. The high iodine content of the herb boosts metabolism by stimulating thyroid function. Fucus appears to assist in lipid balance associated with obesity,

**L-Tyrosine:** The amino acid L-Tyrosine figures highly in the formation of neurotransmitters, special chemicals in the brain which carry out many very important functions, most importantly the smooth transit of nerve impulses along the neural pathways. These neurotransmitters affect mood control, depression, concentration, and cognitive performance. L-Tyrosine may be helpful during weight loss, by improving some of the neurobiological disturbances caused by dietary restrictions.

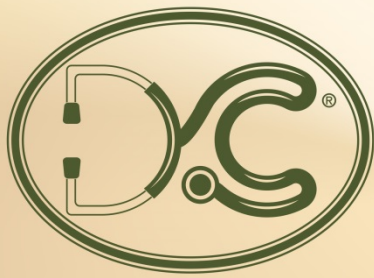

#### **Trace Minerals:**

Trace minerals are included in Doctor's Choice Thyroxycut to work synergistically with the other ingredients in order to maximize overall benefits. The following information deals with how the thyroid uses minerals to perform its functions.

Many minerals are essential to the health of the thyroid gland, with the foremost being iodine, supplemented by the fucus in the formula. But zinc appears to play a role as a thyroid supplement since the production of thyroxin by the thyroid increases as the mineral is added to raise serum zinc levels, but is lower in those with a deficiency. One of the best sources of zinc is our zinc picolinate, because of its high "bioavailability", meaning it is readily absorbed by the body for use.

Manganese is required to transport thyroxin hormone in the cell. And selenium plays a role in thyroid hormone production and metabolism; it is now thought that a severe deficiency of selenium may be a cause of goiter.

Copper is important in the metabolism of the amino acid L-Tyrosine. Although copper deficiency is uncommon, people taking zinc supplements for more than a few weeks should take copper, unless they

have Wilson's disease. This is because zinc interferes with copper absorption and can therefore cause a deficiency. The safest way to ensure balance is to take a good-quality, natural source multivitamin and mineral supplement.

#### **Recommended use or purpose:**

Helps to maintain good health. Helps in the development and maintenance of bones and teeth. Helps in tissue formation. Helps to maintain proper muscle function. Helps in connective tissue formation. Helps to maintain healthy skin. Helps the body to metabolize carbohydrates, fats and proteins. Helps to maintain immune function. Helps to form red blood cells. Provides support for healthy glucose metabolism. Helps to produce and repair connective tissue. Helps in the function of the thyroid gland. Helps to prevent deficiencies of vitamin B12, chromium, and molybdenum.

#### **Recommended dosage:**

Take 1 capsule daily with meal, a few hours before or after taking other medications, or as directed by your health care provider.

Doctor's Choice Thyroxycut is safe and effective when used as directed. This supplement should be taken in conjunction with a healthy diet and regular exercise program. Results may vary. Consult a health practitioner prior to use if you have a kidney disorder, diabetes, hyperthyroidism, cardiac problems, or are following a low-protein diet. Do not use if you are breastfeeding.

#### **Caution/ Risk Information:**

Consult a health care practitioner prior to use if you have a kidney disorder, diabetes, hyperthyroidism, cardiac problems or are following a low protein diet. Do not use if you are pregnant or breastfeeding.

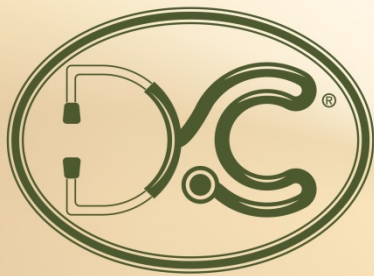

Ingredients: 90V's

Adrenalinum (HPUS Class F).....6 X

Thyroidinum (HPUS Class F).....6 X

L-Tyrosine.....150 mg

Bladderwrack (Fucus vesiculosus) 5:1 extract.....150 mg

Magnesium (Magnesium bisglycinate).....100 mg

Zinc (Zinc Picolinate).....5 mg

Manganese (Manganese bisglycinate ).....1.5 mg

Vitamin B12 (Methylcobalamin).....1,000 mcg

Chromium (Chromium picolinate).....200 mcg

Copper (Cupric citrate).....150 mcg

Iodine (Potassium iodide).....100 mcg

Molybdenum (Molybdenum glycinate).....50 mcg

100% Pure Pharmaceutical Grade, Fermented Amino Acid.

Albion Chelated Minerals, Grass-fed New Zealand Glands, Free of BST and TSE

Contains no wheat, corn, yeast, soy or dairy. V-capsules are made from vegetarian source, no gelatin used.

Non-GMO
