

Testimonial of SalvTonic™

Name: David Chapman
Career: Founder and Ex-president of Purity Life Health Products Limited and part of the Natural Products Industry for over 30 years.

SalvTonic changed my life.

"In my late 50's, I developed angina from a genetic abnormality, which led to heart stents. A few years later the angina returned, then a minor heart attack and another stent. However, the real miracle in my life was discovering SalvTonic. Three years ago, a few years after the heart attack, the angina started up again and I expected another stent. I had read some of the considerable research on SalvTonic and started use it. Within a few weeks the angina went away and never returned. The Cardiologist 'stress test' showed no need for a stent. I go back to the Cardiologist every year and have had no issues since. My blood pressure has returned to normal and I now take 1/3 of what I used to take. I continue to take SalvTonic, as well as a regimen including supplements and fish oil, and I am on a maintenance dosage of 2 SalvTonic per day. It has truly changed my life. No longer having angina is really wonderful."

TASLY

SalvTonic™

Cardiovascular Health

Danshen/Notoginseng Formula

Breakthrough Natural Formula!
Multi-targeted protection for your
heart and blood vessels.

NPN 80006245

About SalvTonic™

SalvTonic was developed in the 1990s by Tasly using modern technologies. Tasly is a leading and public group company specializing in the manufacturing and marketing for biopharmaceuticals, health products and functional foods. SalvTonic is an ideal herbal formula to provide multi-targeted protection for the heart and blood vessels. Over 100 published clinical trials proved that it acts to improve circulation, increase blood flow, reduce plaque formation, and prevent thrombosis.

SalvTonic™, an ideal natural formula to improve and maintain cardiovascular health.

Natural Ingredients

DanShen
(*Salvia Miltiorrhiza*)

Borneol
